Pascal Brandt is a software developer working for Jembi on implementations of OpenMRS. He is also a part-time student pursuing a Masters degree in Bioinformatics with the Bioinformatics Research Group at Stellenbosch University. His main areas of interest are phylogenetics, statistical modelling of biological data and biomedical informatics. Pascal has worked on a range of projects within Jembi and contributed to OpenMRS in terms of the Reporting Framework, HTML Forms module, and will be looking at working on the evolving Logic Service in times to come..
